## (54) DISPLAY FOR IMAGE PLANE OF CAMERA FINDER

## (57)Abstract:

PURPOSE: To protect a guest host liquid crystal which is used for inlaid display in the image plane a camera finder from detrimental beam of light.

CONSTITUTION: An inlaid display device for camera finder having a liquid crystal display means, which is installed in the optical path of the finder and conducts displaying by forming an opaque portion in conformity to given electric signals, is equipped with an eye setting sensing means 9 to sense eye setting to the finder or a photographing lens removal/mounting means, a main switch for camera, a light shutting means 8 to shut light incident from an eyepiece 6 into the optical path of finder as a photo-shield for the liquid crystal display means, and a control means which operates light shutting means when the finder is out of service in response to sensing signals by the use of a single lens reflex mirror 2 or a photographing lens stop device 10.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
